

# OWNER'S GUIDE

 **SEAKEEPER**

# WELCOME TO THE **SEAKEEPER** **FAMILY**

Congratulations on your new Seakeeper! Say good-bye to boat roll, and hello to comfort. Now you can enjoy each and every day on the water, making everlasting memories with your friends and family. So, cheers to a new start, a new outlook on boating, and a truly changed experience on the water.

In these pages you will find the basic operation and maintenance suggestions for caring for your new Seakeeper. Keep this book handy, as it also contains valuable information about your Seakeeper and how to contact us anytime you might need us. We're here for you – you're a part of our family and we're so happy to have you.

Andrew Semprevivo  
President & CEO

# Seakeeper Operation

## Start-up

Turn on the power to the Seakeeper. The Display will initialize and the Home screen will appear.

### Seakeeper On

To turn the Seakeeper on, press the Power On/Off Button. The button will turn blue.

Power On/Off Button

### Spool Up

The Progress Bar will appear in the bottom right and will indicate when the Seakeeper is available for stabilization.

Progress Bar

### Ready to Stabilize

When the Seakeeper reaches its minimum operating speed, the Stabilize Button will appear. At this point, the Seakeeper is available for stabilization.

Stabilize Button

### Maximum Stabilization

When the Seakeeper reaches its maximum operating speed where maximum stabilization is available, the Progress Bar will disappear and the Seakeeper is available for maximum stabilization.

## Stabilization & Information

For stabilization at sea or at anchor after the Seakeeper is above the minimum operating speed:

### Initiate Stabilization

Press the Stabilize Button. The button will turn blue indicating that the Seakeeper is stabilizing the roll motion.

### Information Screen

Press the Menu Button (≡), then the Information Button (i), to access the Seakeeper model, serial number, run hours, sea hours, and more.

Information Button

## Shut Down

### Turn off the Seakeeper

Press the Power On/Off Button. The button will turn gray. It may take between 2-8 hours for the flywheel to come to a complete stop. Please refer to the manual for your particular Seakeeper model.

### Shut Down Process

When the flywheel has come to a complete stop, zero (0) RPM will appear on the service screen indicating that the flywheel has stopped.

# KEEPING YOU ON THE WATER

## 24/7 SERVICE AVAILABILITY

Inspect all mounting hardware/bolts	Inspect	1000	Annually
Inspect isolation bushings, pins, and clips	Inspect	1000	Annually
Clevis assemblies (4), hardware, isolation bushings, pins & clips	Inspect/Replace	1000	---

Perform the Recommended Maintenance after the indicated number of Running [RUN] hours or MONTHS / YEARS since last maintenance, whichever occurs first. Seakeepers are designed for use in a marine environment and to withstand occasional water spray or splash. Prolonged exposure to seawater however can cause premature wear and damage to the unit, therefore it is important to apply a gentle fresh water rinse following exposure to seawater.

Recommended Maintenance should be performed by a certified Seakeeper Dealer or Seakeeper factory technician. Find a local Dealer at [www.seakeeper.com/find-us](http://www.seakeeper.com/find-us)

# REGISTER YOUR SEAKEEPER FOR GREATER REWARDS

The first step to taking full advantage of any of our fabulous after-sales programs is registering your Seakeeper!

Register your Seakeeper at [seakeeper.com/register](https://seakeeper.com/register)

## Seakeeper Standard Warranty
